

YEHAGER BAHIL LIBS

EMS Tracking API Integration Request

Request for technical/API details needed to connect EMS shipment tracking with our ecommerce website.

Hello, we want to integrate EMS tracking into our ecommerce website so customers can automatically track their orders. Please provide the technical/API integration details listed below.

1. API Availability

1. Do you provide an API for shipment tracking?
2. Is the API public, partner-only, or paid?
3. How can our company apply for access?

2. API Credentials

1. API key or access token.
2. Username and password, if required.
3. Account ID, customer ID, or merchant ID, if required.
4. Sandbox or test credentials, if available.

3. Tracking API Endpoint

1. Tracking endpoint URL.
2. Request method: GET or POST.
3. Example endpoint format.

```
https://api.example.com/track
```

4. Required Request Format

1. What fields must we send in each request?
 2. Tracking number field name.
 3. Account ID, country, language, or other required parameters.
 4. Sample request body or sample tracking URL.
-

5. Response Format

1. Sample successful tracking response.
 2. Sample invalid tracking number response.
 3. Sample delivered shipment response.
 4. Please confirm if the API returns JSON, XML, or another format.
-

6. Tracking Status List

1. Shipment received.
 2. In transit.
 3. Arrived at hub.
 4. Out for delivery.
 5. Delivered.
 6. Failed delivery attempt.
 7. Returned.
 8. Any other EMS-specific statuses.
-

7. Rate Limits And Cost

1. How many API requests are allowed per minute, hour, and day?
 2. Is there any cost for API usage?
 3. Is there an extra charge for high-volume tracking requests?
-

8. Webhook Support

1. Can EMS send automatic delivery status updates to our system?
 2. If yes, what webhook URL format do you need from us?
 3. What security method is used for webhook verification?
-

9. Public Tracking Link

1. Is there a public EMS tracking website link?
2. Can we open tracking directly by URL using the tracking number?

`https://ems-site.com/track/TRACKING_NUMBER`

10. Technical Support Contact

1. Technical support email.
2. Phone or WhatsApp support contact.
3. API documentation link or PDF.

Important Requested Materials

Please send the following if available:

- API documentation PDF or link.
- Test tracking number.
- Sandbox API key or sandbox credentials.
- Live API key application process.

Prepared for Yehager Bahil Libs ecommerce EMS tracking integration.
